
MetadataQuarantine

bigint	id	PK	Auto-incrementing surrogate ID
string	incoming_urn		Conflicting incoming URN
string	existing_urn		Conflicting existing URN
string	entity_type		Target DDI entity type
jsonb	incoming_content		Full serialized incoming payload
string	existing_content_hash		Hash of existing record
string	incoming_content_hash		Hash of incoming record
string	conflict_type		Type: staged_urn_drift, hash_mismatch
string	resolution		Status: approved, forked, rejected
string	resolved_by		Reviewing archivist username
timestamp	resolved_at		Review resolution timestamp
string	source_file		Originating file
string	import_task_id		Background task ID
timestamp	created_at		Creation timestamp

Organization

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:org-cdsp:1.0.0)
jsonb	name		Multilingual name [{'lang': 'fr', 'value': '...'}]
string	organization_type		Type: archive, distributor, funder
jsonb	extended_attributes		Extensible attributes array
jsonb	hashes		Content digest hashes {'sha256': '...'}
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

StagedImport

bigint	id	PK	Auto-incrementing surrogate ID
string	source_format		Format: ddi-l:3.3:xml, ddi-c:2.5:xml, croissant, csv
string	file_name		Original uploaded filename
string	file_path		Storage file path
jsonb	import_options		Batch configuration metadata
integer	total_resources		Total staged resource nodes
integer	processed_resources		Processed resource count
string	status		Status: staged, normalized, quarantined, failed
string	import_task_id		Background task ID
timestamp	created_at		Creation timestamp
timestamp	processed_at		Completion timestamp

StagedResourceNode

bigint	id	PK	Auto-incrementing surrogate ID
bigint	staged_import_id	FK	FK -> StagedImport.id
string	resource_type		Entity type (QuestionItem, CodeList, etc.)
string	raw_urn		Raw external URN from source
jsonb	raw_value		Pre-normalized raw payload
string	canonical_urn		Resolved canonical URN
string	status		Status: staged, normalized, quarantined, failed
timestamp	created_at		Creation timestamp

Group

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:grp-ess:1.0.0)
jsonb	name		Multilingual name [{'lang': 'fr', 'value': '...'}]
jsonb	description		Multilingual description
string	group_type		Type: study_series, panel, thematic, collection
jsonb	references		Polymorphic references [{'resource_type': 'StudyUnit', 'urn': '...'}]
jsonb	extended_attributes		Extensible attributes array
jsonb	hashes		Content digest hashes
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

ConceptScheme

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:cs-elsst:1.0.0)
jsonb	name		Multilingual scheme name
jsonb	description		Multilingual description
jsonb	extended_attributes		Extensible attributes array
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

UrnRegistry

string	urn	PK	Canonical URN or external URI
string	resource_type		Target entity type (e.g. QuestionItem)
jsonb	extended_attributes		Extensible attributes array
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

Concept

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:c-politics:1.0.0)
string	scheme_urn	FK	FK -> ConceptScheme.urn
string	uri		Controlled vocabulary URI (e.g. ELSST URI, unique)
string	vocabulary		Thesaurus name (e.g. ELSST, Topics)
string	notation		Thesaurus notation code
jsonb	label		Multilingual preferred label (skos:prefLabel)
jsonb	description		Multilingual description
jsonb	definition		Multilingual definition (skos:definition)
string	parent_urn	FK	FK -> Concept.urn (hierarchical tree / skos:broader)
string	concept_type		Type: domain, concept, top_concept
jsonb	extended_attributes		Extensible attributes array
jsonb	hashes		Content digest hashes
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

URNAlias

bigint	id	PK	Auto-incrementing surrogate ID
string	alias_urn		External / random source URN (unique)
string	canonical_urn		Canonical database URN (indexed)
string	entity_type		Target DDI entity type
string	hash_strategy		Strategy used: v1_strict_sha256
string	source_file		Originating import file
timestamp	created_at		Creation timestamp

SemanticRelationship

bigint	id	PK	Auto-incrementing surrogate ID
string	subject_type		Subject entity type (Concept, ConceptualVariable)
string	subject_urn		Subject URN / URI
string	predicate		Semantic predicate (skos:exactMatch, prov:wasDerivedFrom)
string	object_type		Target entity type
string	object_urn		Target URN / URI
jsonb	extended_attributes		Confidence, tool, notes
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

EventLog

bigint	id	PK	Auto-incrementing surrogate ID
string	urn		Target resource URN (indexed)
string	event_type		Type: created, normalized, quarantined, updated
jsonb	event_data		Arbitrary audit payload metadata
timestamp	timestamp		Occurrence timestamp (indexed)

CategoryScheme

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:cats-scales:1.0.0)
jsonb	name		Multilingual scheme name
jsonb	description		Multilingual description
jsonb	extended_attributes		Extensible attributes array
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

ConceptualVariableScheme

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:cvs-core:1.0.0)
jsonb	name		Multilingual scheme name
jsonb	description		Multilingual description
jsonb	extended_attributes		Extensible attributes array
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

Category

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:cat-left:1.0.0)
string	scheme_urn	FK	FK -> CategoryScheme.urn
string	concept_urn	FK	FK -> Concept.urn (Optional Concept Anchor)
string	parent_urn	FK	FK -> Category.urn (Self-referential hierarchy)
jsonb	name		Multilingual technical name
jsonb	label		Multilingual category label
integer	order		Display order within scheme
boolean	is_missing		Missing value indicator
jsonb	extended_attributes		Inclusions, exclusions, definitions
jsonb	hashes		Content digest hashes
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

CodeList

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:cl-lrscale:1.0.0)
string	scheme_urn	FK	FK -> CategoryScheme.urn (Optional)
jsonb	name		Multilingual human title
jsonb	description		Multilingual description
jsonb	extended_attributes		Extensible attributes array
jsonb	hashes		Content digest hashes
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

ConceptualVariable

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:cv-leftright:1.0.0)
string	scheme_urn	FK	FK -> ConceptualVariableScheme.urn
string	concept_urn	FK	FK -> Concept.urn (Semantic Anchor)
jsonb	name		Multilingual conceptual variable name
jsonb	label		Multilingual human label
jsonb	description		Multilingual description
jsonb	extended_attributes		Extensible attributes array
jsonb	hashes		Content digest hashes
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

QuestionScheme

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:qs-attitudes:1.0.0)
jsonb	name		Multilingual scheme name
jsonb	description		Multilingual description
jsonb	extended_attributes		Extensible attributes array
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

RepresentedVariableScheme

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:rvs-harmonized:1.0.0)
jsonb	name		Multilingual scheme name
jsonb	description		Multilingual description
jsonb	extended_attributes		Extensible attributes array
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

Code

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:code-lr0:1.0.0)
string	code_list_urn	FK	FK -> CodeList.urn
string	category_urn	FK	FK -> Category.urn
string	parent_urn	FK	FK -> Code.urn (Self-referential hierarchy)
string	code_value		Discrete code value (1, 98, DK)
integer	order		Display order within code list
boolean	is_missing		True if non-response / missing
jsonb	extended_attributes		Extensible attributes array
jsonb	hashes		Content digest hashes
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

StudyUnit

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:su-ess2007:1.0.0)
jsonb	name		Multilingual dataset identifier
jsonb	title		Multilingual study title
string	external_ref		External DOI / repo identifier (unique)
integer	year		Reference survey year
jsonb	description		Multilingual study abstract
jsonb	extended_attributes		Methodology, universe, sampling
jsonb	hashes		Content digest hashes
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

Instrument

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:inst-ess3:1.0.0)
jsonb	name		Multilingual questionnaire name
jsonb	label		Multilingual title
jsonb	description		Multilingual description
jsonb	extended_attributes		Mode of collection, administration notes
jsonb	hashes		Content digest hashes
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

QuestionItem

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:qi-leftright:1.0.0)
string	scheme_urn	FK	FK -> QuestionScheme.urn
string	code_list_urn	FK	FK -> CodeList.urn (Direct Coded Domain)
jsonb	response_domain		Response domain JSON (code, numeric, text, scale)
jsonb	name		Multilingual technical name
jsonb	question_text		Multilingual literal question wording
jsonb	extended_attributes		Interviewer instructions, preamble, intent
jsonb	hashes		Content digest hashes
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

RepresentedVariable

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:rv-lrscale:1.0.0)
string	scheme_urn	FK	FK -> RepresentedVariableScheme.urn
string	conceptual_variable_urn	FK	FK -> ConceptualVariable.urn (Cascade Top)
string	code_list_urn	FK	FK -> CodeList.urn (Direct Code Structure)
jsonb	value_representation		Representation details JSON
jsonb	name		Multilingual variable name
jsonb	label		Multilingual human label
jsonb	description		Multilingual description
jsonb	extended_attributes		Data type, valid ranges, variable notes
jsonb	hashes		Content digest hashes
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

InstanceVariableScheme

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:ivs-ess2007:1.0.0)
jsonb	name		Multilingual scheme name
jsonb	description		Multilingual description
jsonb	extended_attributes		Extensible attributes array
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

Datafile

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:df-bpf2007:1.0.0)
string	study_unit_urn	FK	FK -> StudyUnit.urn
jsonb	name		Multilingual file name (e.g. bpf2007.sav)
jsonb	description		Multilingual file description
jsonb	extended_attributes		File format, case count, storage location
jsonb	hashes		Content digest hashes
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

StudyInstrument

bigint	id	PK	Auto-incrementing surrogate ID
string	study_unit_urn	FK	FK -> StudyUnit.urn
string	instrument_urn	FK	FK -> Instrument.urn
string	path		Sequencing/referencing path
integer	order		Display or execution order
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

InstrumentQuestion

bigint	id	PK	Auto-incrementing surrogate ID
string	instrument_urn	FK	FK -> Instrument.urn
string	question_item_urn	FK	FK -> QuestionItem.urn
string	path		Questionnaire routing path (e.g. /Seq/Q01)
integer	order		Display / sequencing order
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

QuestionVariable

bigint	id	PK	Auto-incrementing surrogate ID
string	question_item_urn	FK	FK -> QuestionItem.urn
string	represented_variable_urn	FK	FK -> RepresentedVariable.urn
string	path		Referencing path / XPath
integer	order		Association sequence order
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

InstanceVariable

string	urn	PK	Canonical URN (e.g. urn:ddi:fr.sciencespo:iv-ess2007-q01:1.0.0)
string	scheme_urn	FK	FK -> InstanceVariableScheme.urn
string	represented_variable_urn	FK	FK -> RepresentedVariable.urn (Cascade Mid)
jsonb	name		Column name / mnemonic (e.g. q01a, lrscale)
jsonb	label		Multilingual column label
jsonb	description		Multilingual description
jsonb	extended_attributes		Storage format, missing values, column index
jsonb	hashes		Content digest hashes
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

DatafileVariableFrequency

bigint	id	PK	Auto-incrementing surrogate ID
string	datafile_urn	FK	FK -> Datafile.urn
string	instance_variable_urn	FK	FK -> InstanceVariable.urn
string	code_value		Discrete categorical response code string
float	frequency		Frequency count statistic (weighted or unweighted)
string	weight		Optional weighting variable or specification
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp

DatafileVariable

bigint	id	PK	Auto-incrementing surrogate ID
string	datafile_urn	FK	FK -> Datafile.urn
string	instance_variable_urn	FK	FK -> InstanceVariable.urn
integer	order		Column sequence or display order
jsonb	statistics		Descriptive statistics JSONB (mean, min, max, stddev, etc.)
timestamp	created_at		Creation timestamp
timestamp	updated_at		Update timestamp
